YOUR WORLDWIDE SERVICE PARTNER

FOR INDUSTRIAL FILTRATION

AFTERMARKET AND SERVICE

WE MAKE SURE THAT EVERYTHING RUNS SAFELY AND ECONOMICALLY

Advice and solution—integral and systematic

The expertise and reliability with which we develop individual solutions is the main reason for our worldwide success. This is due to our knowledge and experience of the complex interactions of filter technology, which makes us a market leader. We always look at the complete system to develop a technically and economically optimized solution. We take a great deal of information, data, and system parameters into consideration and tailor everything to your needs, from the process requirements to the location of the filter.

As service-oriented filtration experts, we can demonstrate our practical strengths. Because optimal productivity of your systems also requires that the filtration systems are ready for operation and fully functional at the right time.

The expansion and upgrade service of After-market MAHLE Industrial Filtration offers you economical and viable solutions. After all, you do not necessarily have to invest into a new system to utilize the latest functions or expand capacities. Upgrading and modernizing your existing equipment frequently constitutes a practical and cost-effective alternative to a useful expansion of your system.

Original, approved spare parts—delivered promptly

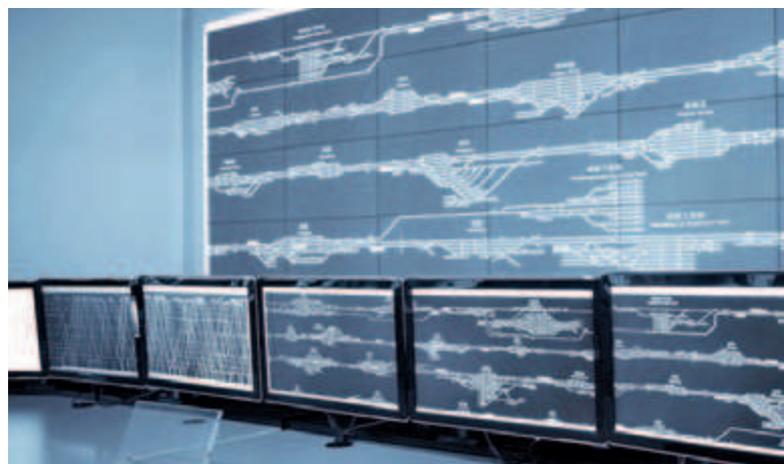

As your reliable service partner we continuously work to become better. Our cleverly devised global logistics system makes it possible for

many of your spare parts to arrive within 24 hours after the order has been placed. For this purpose, we maintain modern logistics centers in Central Europe, Asia, North and South America.

With our exchange components, we offer a highly efficient system that saves you time, hassle, and costs, when it really matters. Your production operation can continue, while we analyze and correct the problem in our service department.

Our spare parts packages offer total filtration solutions

We employ fine-tuned test methods and tailored equipment for monitoring filters and systems. For example, our optical/electrical maintenance indicators and mobile measuring devices are used for ongoing controls. Use our monitoring service and increase the reliability, safety, and availability of your machinery and systems.

CALLY

Our help: fast, economical, tailored exactly to your needs

The top priority is to minimize your production downtime and deliver top quality products to specification. To ensure that we can help you promptly with comprehensive service or spare parts in the event of an emergency, we have a network of specialists who are permanently on standby. That way, we can help you quickly and reliably.

With our in-house laboratory services, you have the satisfaction of knowing that your process is fully understood by the Aftermarket MAHLE Industrial Filtration, your service partner. You receive precise results on the filtration efficiency of your equipment. All the necessary services are in accordance with internationally recognized standards—regardless of size, dimension, or original equipment manufacturer.

With a maintenance contract from Aftermarket MAHLE Industrial Filtration, everything is covered with a bespoke schedule for you. It covers all prescribed maintenance work—matched precisely to your equipment and processes. We directly consult with you and prepare a tailor-made maintenance and spare parts program that exactly meets your expectations and needs.

For best system performance, they are optimally adapted to the application, the use in the process, the age, condition and hazardous nature of the equipment, as well as the value and sensitivity of the process fluids.

Your employees play a key role in the success of your daily production operation. As your service partner for filtration and separation systems, we offer dedicated training programs, which we jointly tailor to your system, your requirements, and the needs of your employees.

GLOBAL AFTERMARKET SERVICE

FOR YOU ON SITE

Aftermarket MAHLE Industrial Filtration— more service for you worldwide

MAHLE Industrial Filtration is continuously expanding its service expertise and support for the aftermarket business. For our customers, we have pooled the worldwide activities of the aftermarket service into one area: Aftermarket MAHLE Industrial Filtration.

Our strengthened service expertise allows us to offer you even more customer value in the global network with an extensive range of filters and filter systems of certified quality, delivered promptly at competitive prices. This means added value performance for maximum availability, production and process reliability, as well as cost effectiveness for your equipment.

Partnership with true added value

Our team of experienced aftermarket specialists supports you in all areas of fluid technology, air filtration, process technology, and separation. Worldwide. Our goal is to make your filtration and separation processes as efficient, smooth, and effective as possible. Since this requires a comprehensive understanding of your processes, our experienced staff works closely with you. Your cost effectiveness, competitiveness, and plant reliability can be fully optimized. In times of rising quality demands on the production environment, this will benefit your business.

Your added value in service:

- Filtration solutions and services for most filtration systems—even for non-MAHLE products
- Maximum performance thanks to higher filtration performance
- Reduced operating costs, less stoppage times, higher availability and productivity
- Technical advice from our experts
- On-site service during start-up and trouble shooting
- Wide range of spare parts for practically all filtration systems with proven MAHLE quality
- Maintenance programs
- Training programs
- High product availability
- Fast delivery service and spares
- Certified quality, tested according to DIN and ISO standards, with associated industrial approvals

Innovative service partner with leading filter expertise

For decades, MAHLE Industrial Filtration has been producing high-quality industrial filters for fluid technology, air filtration, process technology, and separation. They are just as efficient and economical in machine and systems building, the automotive industry, and the chemical, pharmaceutical, and food industries as in environmental and drive technologies, power engineering, marine technology, and mobile machinery systems. Take advantage of our tailor-made aftermarket service, from propriety spares, technical advice, installation, and start-up, to systems monitoring and laboratory support.
